Machine Vision

Vision Expert Huddles

Application Deadline: 05 October 2020

In cooperation with the trade magazine inVISION, the VDMA Machine Vision division organises for the first time a presentation forum for machine vision at automatica 2020: the **Vision Expert Huddles**.

The aim is to bring trade fair visitors into conversation with machine vision experts. A short keynote speech on the latest technologies and trends in machine vision, in an open atmosphere, will be followed by exchange and discussion with the audience. In this way, automatica visitors will become machine vision experts!

The Vision Expert Huddles are open to all exhibitors at automatica 2020 and are free of charge. The programme will be put together by VDMA MV and inVision in May. Participants will be notified at the end of October.

Yes, I am interested in participating in the "Vision Expert Huddles":
